Federal Communications Commission
455 12th St NW
Washington, DC 20554

In the matter of WC Docket No. 17-107, *Restoring Internet Freedom*.

Dear Chairman Pai,

Common Cause¹ was founded in 1970 as the “people’s lobby.” Our members care deeply about good governance, transparent decision making, and achieving reforms that ensure the public’s faith in its leadership. Responsive governance depends on an informed electorate, so a strong public interest framework is essential.

As ever, our more than 900,000 members believe that strong Open Internet protections are essential. As our members have repeatedly asserted over the years and many rounds of this debate, the FCC correctly classified Broadband Internet Access Service as a telecommunications service in 2015. Please see our members’ reply comments below.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "T O'Boyle", with a long, sweeping horizontal line extending to the right.

Todd O'Boyle
Program Director,
Common Cause

¹ Common Cause is a nationwide, nonpartisan grassroots network dedicated to upholding the core values of American democracy. On behalf of its more than 900,000 members in all 50 states, Common Cause works to create open, honest, and accountable government that serves the public interest; and to empower all people to make their voices heard in the political process.

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Leo Buckley

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

I have a personal and professional stake in this debate since I am an educator who uses the internet heavily in my teaching. The last thing I want is for internet providers to restrict the flow of information for their own profit. Freedom of information is what this country needs to improve education and build a highly educated workforce.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Janet Yoshida-Gordon

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Christi Fath

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Barb Immroth

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Esther Kirchheimer

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Alice Gosse

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Net Neutrality must be in affect for control by the people. America is a democracy, which is the Greek word for, "Rule of the people." We do have representatives, but no one person shares the exact same views and values. The great thing about the internet is that people have the ability to express themselves through almost any means and bring in a wide variety of ideas. Restrictions on this from other companies with their own biases and personal agendas will limit people's abilities to gain access to sites that may entertain, educate, and even inspire them. I have learned a lot thanks to the internet, and I fail to see how putting it into the limiting hands of corporations with their own agendas will benefit the internet. The advances we have today are mainly due to everyone having a say and giving their own ideas.

Sincerely,
Tyler Bostrom

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

As a professor of computer science and an educator of the next generation of Internet innovators in this country, I ask you to please uphold the net neutrality principle. Our information economy depends vitally on having a free, open Internet that ensures the free flow of information and allows innovative new applications to arise without being stifled by entrenched operators.

Broadband should continue to be a Title II telecommunications service, and the FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Robert Miller

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Rather than looking at advancing profit centers for internet service providers, the FCC should be focused on expansion of rural internet infrastructure to increase internet access, reduce competition gaps and add a substantial market base. Many of the telecommunications businesses that would "benefit" from the proposed restrictions have joined in opposition of limits on Net Neutrality.

Personally, my business and family have recently been subjected to back-door bandwidth reductions. Without our knowledge or consent, our long term ISP modified their software to reduce the bandwidth of our existing service such that streaming of an online advanced education class was made impossible. Upon notification of the deficiency, the repair technician adjusted the software settings to allow previous data transmission levels.

Businesses in all sectors rely on affordable electronic communications. Rural medical professionals cannot utilize electronic medical records without reliable high-speed internet. Rural farmers cannot sell their products competitively without access to established exchanges. Rural educators cannot teach effectively and rural students cannot learn limitlessly without access to online research. Rural manufacturers cannot ship goods or source inputs without access to online resources. Rural businesses cannot grow without access to electronic markets. Allowing limitations on this necessary public utility is, in effect, hobbling rural America.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor

undermine the general conduct rule.

Sincerely,
Sheila Gregg

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

I am writing to strongly urge you to uphold the principle of net neutrality. We, the average citizen and resident deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It maintains our first amendment right to freedom of speech. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Please uphold the principle of net neutrality -- we deserve a free and open Internet with strong Title II rules.

Net neutrality is vital to 21st century citizenship. Keeping the Internet free of blocking, throttling, and paid prioritization schemes ensures the free flow of information. It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Jennifer Menard

It allows individuals to speak - and be heard. It makes online organizing for change possible, and empowers the people to hold the powerful accountable.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Elliott Franklin

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Here's what I want to say to you about Net Neutrality. Stop screwing around with it. Leave it alone. Leave it be. Just get it through your thick and small head that a WHOLE bunch of people in this world, including me, hate this bullcrap that you're trying to do. NOBODY WANTS THIS!!! We, the people, love a free and open internet. We, the people, DON'T like to be blocked, throttled, charged and forced to pay for what should be free. I don't care what your damn reasons are for doing this bullcrap, but it's WRONG, WRONG, WRONG!!! We, the people, do have our 1st amendment rights; to say what we want, to watch what we want, to do what we want, and enjoy what we want, especially on an open and free internet. And the responsibility of what we do, whether on the free internet or elsewhere should lie with us, the people, not you snot nose business and political snobs. This is America, the land of the freedom. FREEDOM!! Do you not know what that word means? Do you even have a clue that what you've been doing IS indeed underhanded, despicable, and against the true good moral values of America? Do you even know the meaning of equality? Do you? DO YOU!? Obviously not!! People like you who still on your high corporate business thrones don't give a damn about us regular people or our rights and freedoms; you corporate people don't give a damn about anything except yourselves, your reputation, and of course money, money, money; how fast you can get it, all while not caring what damnable things you do in order to get!! Its people like you that's rotting America and hell, even the world from the inside out!

Stop trying to make things worse for this country AND this world of ours. We're having enough trouble trying to fix massive global problems as well as making this a better place for everyone without you throwing this crap bomb on our heads and making things harder for everyone. So for God's sake, just take the damn hint; stop this bullcrap and leave the Net Neutrality alone. Let us, the people, have the free open internet that we want.

Sincerely,
Heather McCune

Re: In the matter of WC 17-108 Restoring Internet Freedom

Dear Chairman Pai,

Please uphold the principle of net neutrality. Americans have a right to a free and open Internet with strong Title II rules.

Internet service is a utility and, like electricity or water services, it should be freely available to all who pay for its use. Moreover, net neutrality is vital to 21st century citizenship. It allows a free exchange of ideas and makes online organizing for change possible.

The 2015 Open Internet Order correctly classified broadband as a Title II telecommunications service, and wisely created the general conduct rule to policy gatekeeping by broadband internet access providers. The FCC must neither change the classification of broadband providers, nor undermine the general conduct rule.

Sincerely,
Marilyn Kohn
